Database Tools	SQFlite, Firebase, Hive
Version Control	GIT
IDEs	Android Studio, VS Code

EXPERIENCE DETAILS:

Let's Enkindle PVT. LTD.
Senior Flutter Developer
Nov 2022 -Present

Primocys PVT. LTD.
Oct 2019 - Nov 2022

PROJECT DETAILS:

Project 8: MyDx

Link: -

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (December 1 – Present)

Project Description:

Contributed to the development of MyDX Lab Process App, a user-centric healthcare solution. Played a key role in streamlining the health journey by enabling users to receive, conduct, and return test kits seamlessly. Implemented real-time FedEx tracking within the app, providing users with immediate visibility into kit delivery and return timelines.

Focused on enhancing user experience, ensured clear communication by incorporating instant notifications for every stage of the lab process. Established a user-friendly support channel for quick query resolution. Contributed to a transparent and stress-free health testing experience, showcasing a commitment to innovation and customer satisfaction.

Responsibilities:

- Attending a meeting to understand the project Requirement.
- Meeting with Scrum team
- Read documents & analyze the module
- Development & Implementing
- Help to team & support
- Designing database design
- Implementing modules involved in project

Project 8: Aly Telehealth

Link: <https://apps.apple.com/in/app/aly-telehealth/id1645524166>

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (November 22 – September 12)

Project Description:

Aly is a cloud-based platform designed to streamline communication among hospitals, doctors, and support staff in Telehealth companies. Leveraging SignalR WebSockets, it provides instant updates on consults, ensuring timely notifications for healthcare professionals. Firebase push notifications enable real-time updates even when users are not actively using the app. Aly also offers a secure chat functionality for efficient collaboration. With Aly, Telehealth companies can optimize their workflow, enhance patient care, and improve overall efficiency.

Responsibilities:

- Attending a meeting to understand the project Requirement.
- Meeting with Scrum team
- Read documents & analyze the module
- Development & Implementing
- Help to team & support
- Designing database design
- Implementing modules involved in project

Project 7: Vendue

Link: https://play.google.com/store/apps/details?id=com.primocys.vendue&hl=en_IN&gl=US

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (January 2022 – September 2022)

Project Description:

Vendue is a revolutionary platform that transforms consumer choice. With Vendue, users can browse for last-minute cancellations and secure incredible deals up to 15 minutes before the original scheduled time. The app offers convenient category-based search, subscription notifications, and immediate buys through Google Maps integration. Discover and seize exciting opportunities with Vendue, giving you the freedom to choose on your own terms.

Responsibilities:

- Attending a meeting to understand the project Requirement.
- Development & Implementing
- Read documents & analyze the module
- Help to team & support
- Designing database design
- Implementing modules involved in project

Project 6: Sellapy

Link: https://play.google.com/store/apps/details?id=com.flutter_sellapy_app&hl=en&gl=US

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (May 2021 – February 2022)

Project Description:

Sellapy is the leading B2B and B2C mobile marketplace for wholesale and retail trade of African products globally. With legal compliance, users can conveniently purchase products from manufacturers and suppliers across Africa. The app integrates Google Maps for store location, offers vendor and buyer flows, push notifications, and chat support. Sellapy revolutionizes trade by empowering users to explore African products on their mobile devices, connecting them with a diverse marketplace while ensuring legal compliance.

Responsibilities:

- Attending meeting for understand the project Requirement.
- Read documents & analyze the module.
- Generate doc for query.
- Help to team & support.
- Designing database design.
- Development & Implementing.
- Implementing modules involved in project.

Project 5: Snapta

Link: <https://play.google.com/store/apps/details?id=com.snaptanew.primocys&hl=en&gl=US>

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (November 2020 – April 2021)

Project Description:

Snapta is a dynamic app designed for sharing images and videos with your close friends and family. With Snapta, you can create a private network, follow each other, and enjoy the seamless sharing of precious moments. The app allows you to effortlessly share stories, connecting you with the world and keeping you updated with your connections' latest updates. Snapta empowers users to easily connect, share, and stay connected with loved ones through an intuitive and immersive platform.

Responsibilities:

- Attending a meeting to understand the project Requirement.
- Development & Implementing.
- Help to Develop team & support.
- Designing database design.
- Implementing modules involved in project.

Project 4: Whoxa Clone

Link: https://play.google.com/store/apps/details?id=com.flutter.whoxaNew&hl=en_US&gl=US

Role: Sr. Flutter Developer

Tools/Technologies: Firebase, Flutter, GIT

Duration: (January 2020 – October 2020)

Project Description: Whoxa is a complete WhatsApp like chat application that showcases a modern chatting solution app in which users can chat with individuals, chat in groups, can send images, videos, voice notes, documents as well as users can video call and voice calls with other users. Whoxa is a Slick and modern looking UI Demo template that is eye-soothing and has the potential to provide one place chatting solution where everything is a tap away.

Responsibilities:

- Attending meeting for understand the project Requirement.
- Development & Implementing.
- Read documents & analyze the module.
- Generate doc for query.
- Help to team & support.
- Designing database design.
- Implementing modules involved in project.

Project 3: OnDemand Home Service User App

Link: <https://play.google.com/store/apps/details?id=com.primocys.eshield&hl=en&gl=US>

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (January 2019 – June 2019)

Project Description:

The On-Demand Home Service User App, Booking App including Sell Products with Admin Panel (Multi-Vendor) is a platform that enables users to book home services and purchase products. It consists of a user app with features such as user registration/login, service/product browsing, booking/ordering, payment integration, ratings/reviews, notifications, and customer support. The admin panel allows managing vendors, services/products, orders, payments, and analytics. The app offers a seamless user experience and facilitates a multi-vendor marketplace for service providers and product sellers.

Responsibilities:

- Attending a meeting to understand the project Requirement.
- Development & Implementing
- Read documents & analyze the module
- Help to team & support
- Designing database design
- Implementing modules involved in project

Project 2: QuikPlace

https://play.google.com/store/apps/details?id=com.quik_tok&hl=en&gl=US

Role: Sr. Flutter Developer

Tools/Technologies: Flutter, GIT, Firebase

Duration: (January 2019 – March 2020)

Project Description:

Unimaginable growth, right at your fingertips. Want to promote your song or brand, but don't have time to contact creators, figure out if you are getting fair pricing, and not sure if you will get scammed? QuikPlace solves this problem as the world's first truly public creator marketplace. QuikPlace connects TikTok, Instagram, YouTube, and Twitter creators to brands / musicians / record labels looking for a promotion
